Abderrahim ADHAOUR

abderrahimadh

Professional Summary

Junior DevOps Engineer with hands-on experience in CI/CD automation, cloud infrastructure and Linux-based environments. Passionate about automation, reliability, scalable distributed systems and cloud-native technologies.

Education

Mohammadia School of Engineers - EMI - Engineering Degree, Computer Science | Sep 2023 - Jul 2026

Preparatory Classes for Engineering Schools - PSI | Sep 2021 - Jul 2023

Professional Experience

DevOps Engineer Intern (PFE) Attijari Payment | Feb 2026 - Jun 2026

- Implemented and maintained CI/CD pipelines to automate build and deployment workflows.
- Supported production environments monitoring, incident troubleshooting, and operational tasks.
- Contributed to system hardening and deployment reliability for critical payment services.

Cloud & DevOps Engineer (Apprenticeship) JESA | Oct 2025 - Dec 2025

- Improved AKS cluster reliability and security using Kubernetes and Azure best practices.
- Integrated HashiCorp Vault for secrets management and secure access control.
- Enhanced monitoring and compliance through Azure Security Center and cloud governance.

DevOps & CloudOps Engineer Intern Valhko | Aug 2025 - Dec 2025

- Automated CI/CD pipelines with Azure DevOps and GitHub Actions, improving delivery speed by 40%.
- Deployed Dockerized applications on Kubernetes for scalable cloud environments.
- Managed multi-cloud provisioning with Terraform across AWS, Azure, OVHcloud and GCP.

AI & Full Stack Developer Intern BaridMedia | Jul 2025 - Aug 2025

- Built a secure document signing system with face verification and liveness detection.
- Integrated real-time face capture and authentication pipeline into a web platform.

Full Stack Developer Intern Province Chtouka Ait Baha | Jul 2024 - Aug 2024

- Built an HR management web app for attendance and performance tracking.
- Automated employee reports and reduced manual work by 60%.
- Ensured secure access through role-based authentication.

Projects

3-Tier Microservice Voting App CI/CD with Azure DevOps & AKS

- Built end-to-end CI/CD pipelines deploying Docker microservices to AKS using Azure DevOps.
- Implemented GitOps delivery with ArgoCD and managed Kubernetes manifests and secrets.

Scalable CI/CD DevOps Pipeline for Java Application

- Automated CI/CD pipeline with Jenkins, Docker, SonarQube, Trivy, and Nexus.
- Deployed on Kubernetes and monitored using Prometheus and Grafana alerts.

AWS Cloud Pentesting Project

- Developed a Python-based security auditing tool for AWS (EC2, RDS, S3, IAM).
- Generated HTML risk reports with CVSS scoring and remediation recommendations.

Certifications

- Microsoft Certified: Azure Administrator (AZ-104) – In progress
- AWS Cloud Quest: Cloud Practitioner
- PwC Technology Consulting Job Simulation
- Deloitte Data Analytics Job Simulation

Skills

- Programming & Scripting:** Python, Java, C++, JavaScript, SQL, Bash/Shell
- DevOps & CI/CD:** Docker, Kubernetes, Apache Airflow, Git, GitHub, GitLab CI/CD, Azure DevOps, Jenkins, ArgoCD
- Cloud & IaC:** AWS, Azure, GCP, OVHcloud, OpenShift, Terraform, Ansible
- Monitoring & Security:** Prometheus, Grafana, SonarQube, Trivy, Vault, Nexus
- Software Engineering:** Linux, Agile (Scrum), Data Structures & Algorithms, MySQL, PostgreSQL, MongoDB
